SUCCESS STORY

What changes have you noticed since beginning vision therapy? Use reverse if needed.

Better reading fluency, better spelling, better writing, less headaches, less frustration at home work time, reduction of amount of time it takes to do homework, less reversals.

Have your goals been met? YES

Please comment: I wanted her to catch up to her peers in her reading and spelling ability. She's done this. In 3 months she improved to grade level when she was almost 2 levels behind.

Would you recommend this service to others? YES

Comments: If you suspect dyslexia or other learning disabilities I highly recommend a functional vision exam.
